vec_count(large_attend_df$cap)
```

```
##      key count
## 1 NO         23
```

Cap giveaways were clearly not a driver of attendance. There are 0 cap giveaway games in the large attendance group.

```
vec_count(small_attend_df$shirt)
```

```
##    key count  
## 1  NO      21
```

```
vec_count(med_attend_df$shirt)
```

```
##    key count  
## 1  NO      36  
## 2 YES       1
```

```
vec_count(large_attend_df$shirt)
```

```
##    key count  
## 1  NO      21  
## 2 YES       2
```

Only 2 out of the 23 largest attendances had shirt giveaways, an insignificant number.

```
vec_count(small_attend_df$fireworks)
```

```
##    key count  
## 1  NO      20  
## 2 YES       1
```

```
vec_count(med_attend_df$fireworks)
```

```
##    key count  
## 1  NO      26  
## 2 YES      11
```

```
vec_count(large_attend_df$fireworks)
```

```
##    key count  
## 1  NO      21  
## 2 YES       2
```

The medium-sized crowds has the greatest number of fireworks presentations for games. One can posit that while fireworks shows do not equate with large crowds, they may boost otherwise small crowds into larger crowds.

```
vec_count(small_attend_df$bobblehead)
```

```
##    key count  
## 1  NO      21
```

```
vec_count(med_attend_df$bobblehead)
```

```
##    key count  
## 1  NO     37
```

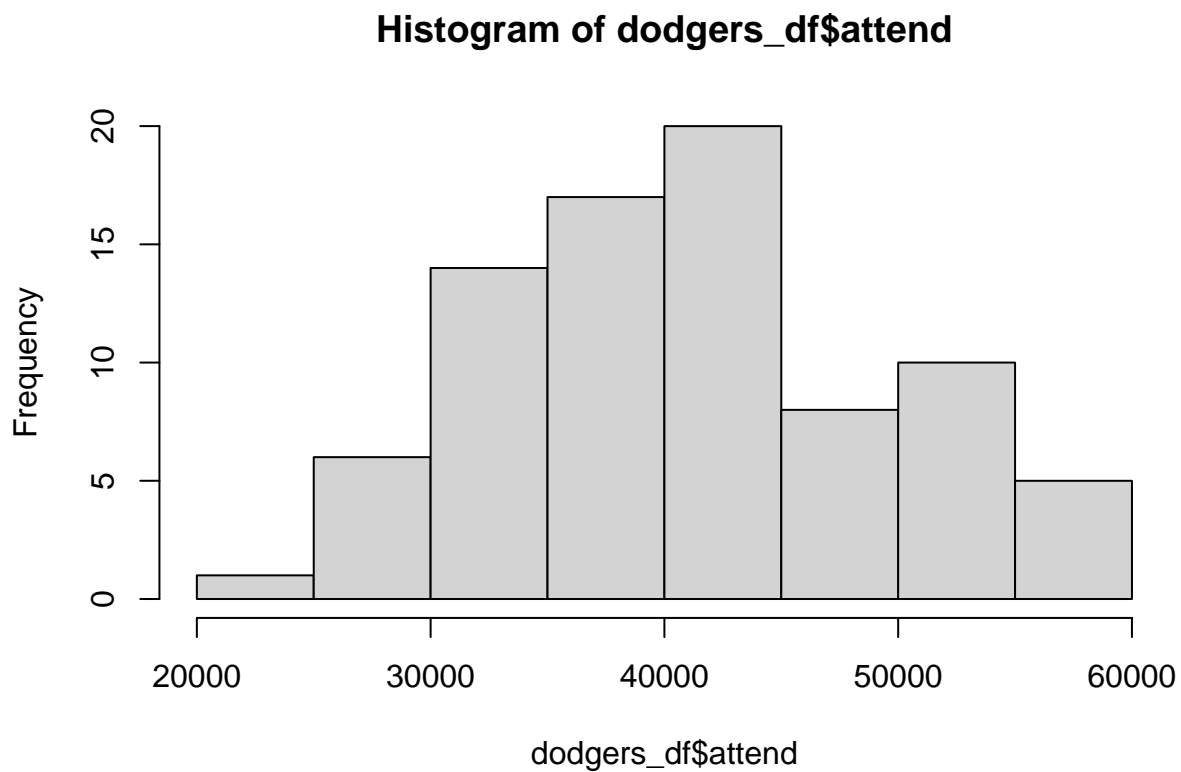

```
vec_count(large_attend_df$bobblehead)
```

```
##    key count  
## 1  NO     12  
## 2  YES    11
```

Every bobblehead giveaway game produced a large attendance. It would most definitely be appropriate to offer more bobblehead giveaways.

```
library(ggplot2)
```

```
hist(dodgers_df$attend)
```

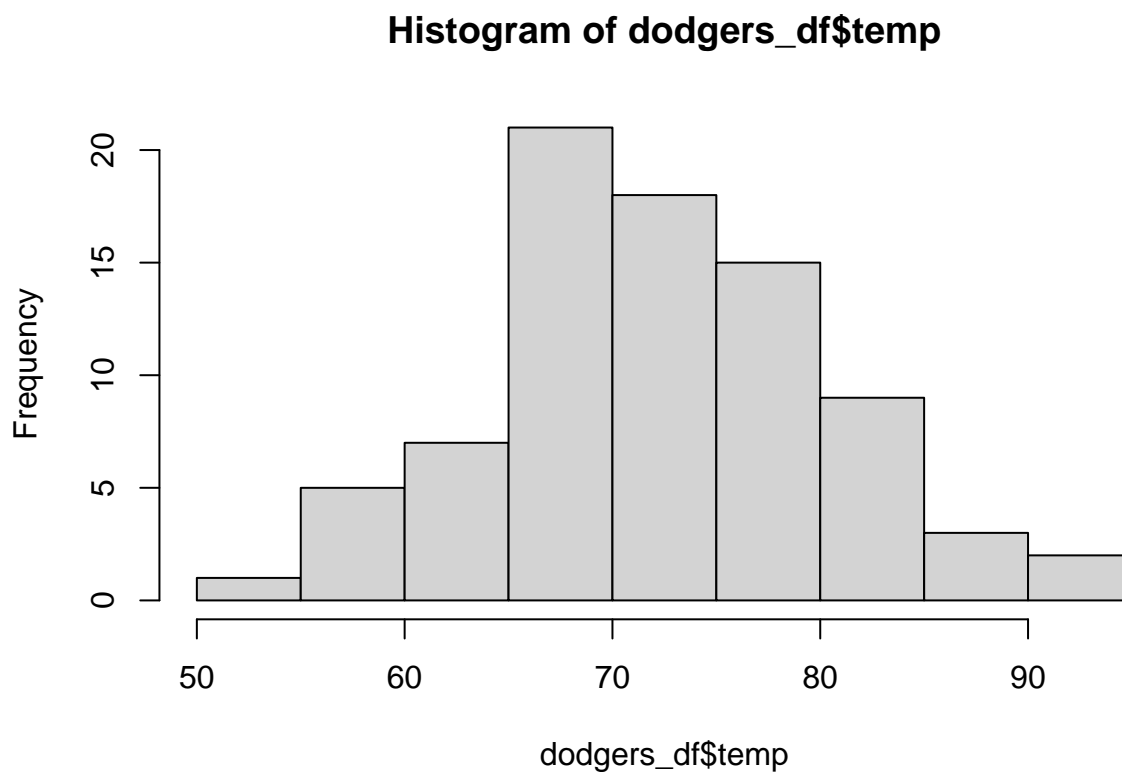

Attendance is normally distributed, and the Dodgers lead the league in attendance.

```
mean(dodgers_df$attend)
```

```
## [1] 41040.07
```

Any decreases in attendance reflect the pandemic. MLB has yet to bounce back(<https://www.baseballamerica.com/stories/mlb-attendance-dipped-significantly-from-pre-pandemic-numbers/>).

```
hist(dodgers_df$temp)
```

Temperatures are normally distributed, and beautiful.

Summary Recommending ways to increase attendance at L.A. Dodgers home games is a particularly vexing issue for several reasons. The Dodgers have led MLB in attendance for years, so they are at the top. Moreover, the most common recommendation is to put a winning product on the field, and the Dodgers have done just that. Statistically it is highly unlikely to outperform their winning percentages. It is highly unlikely that they even match their prior years wins totals. They won 111 and 106 games respectively over the past two years. A 100-win season is an aberration in baseball, let alone accomplishing this feat three years in a row. The main declines in attendance across MLB are due to the Covid-19 pandemic. MLB is recovering slowly. The greatest spur to attendance may very well be the time lapsed since the end of the pandemic. Recommendation goals should be small increases in attendance. I reduced the problem by creating three dfs including small attendance (less than 35,000), medium attendance (between 35,000 and 45,000), and large attendance (more than 45,000). Approaching attendance granularly, one can aim to give incremental boosts by comparing a smaller group to a larger group, and suggesting what the larger group includes which is missing in the smaller group. While fireworks shows do not figure in large audiences, they do occur in medium audiences, and not small ones. I recommend more fireworks displays for the expected boost it gives in attendance. Likewise, bobblehead giveaways only occurred on large crowd days. Adding more bobblehead giveaway days should add more large attendance days. There is not data on bat giveaways, but I recommend bat days because they have historically brought out the fans. The PCA produced two components which account for 29% of the variance. These two components suggest scheduling as many Friday night games as feasible. Also fireworks shows are positively correlated with attendance, so one would expect more large attendances with more fireworks shows.
